From QC to Chief Technology and Product Officer at Meetup. A Conversation with Rajib Ahmed '04

MONDAY, OCTOBER 3, 2022 • 10:45 AM–12 PM
Science Building, Room B141

Rajib Ahmed is the Chief Technology Officer/Chief Product Officer of Meetup, a social media platform for hosting and organizing in-person and virtual activities. He is a technology leader with over 16+ years of experience in industries including automotive, eCommerce, government, health, media, and software. In addition to Meetup, Ahmed has built and managed software at Rodo, Investopedia, Everyday Health, Filenet Architect, and RFCUNY.

He loves to code, read technology books and articles, and is a mobile app first advocate. Over the course of his career, Ahmed has become an advocate of quality in software, software development, and data-driven practices — he believes it is what makes or breaks the technology experiences we encounter daily. Still an engineer at heart, he appreciates that quality takes on many forms and is usually found in the details. He leads with this in mind, involving team members early and being intentional about that engagement to help drive both quality and customer satisfaction. Ahmed is also on the Science Advisory Board at Queens College.
